

Award-winning Architects Break Ground for Habitat for Humanity

Round Rock, TX—January 29, 2009

Moman Architects was selected to re-design five residential floor plans for Williamson County Habitat for Humanity, which will be the foundation for Round Rock's first Habitat homes and others slated to be built throughout the county. The architectural firm, known for their award-winning commercial, industrial, and public projects, has updated the original residential floor plan in order to meet city building codes that require a minimum of two bathrooms per family home.

"Our dedicated team is honored to be a part of this outstanding community project, which assists hard-working families realize the dream of a owning their first home," says John S. Moman, AIA, President of Moman Architects.

In addition to designing the homes, Moman employees will also play a significant role in the actual construction, picking up shovels and swinging hammers. As a leader in commercial design, Moman is highly experienced in designing buildings that are economical and efficient.

Habitat for Humanity, a nonprofit organization seeking to eliminate poverty housing and homelessness, has built more than 300,000 houses around the world providing more than 1.5 million people in more than 3,000 communities with safe housing. As they expand their reach to Round Rock, Moman Architects is proud to be at the forefront of this exciting community milestone.
